

Downstream Pledge of Responsible Recycling

SAFE HARBOR SYSTEMS is fully committed to upholding the best practices in Responsible Electronics Recycling. We are committed to ensuring that the entire recycling chain, including downstream intermediaries and recovery operations are meeting all applicable environmental and health regulations. Every effort will be made to exclusively make use of those facilities which provide the most efficient and least polluting recovery services available globally.

SAFE HARBOR SYSTEMS and its partners have pledged the following.

- A. Will not allow any hazardous e-waste handled or controlled to be sent to solid waste (non-hazardous waste) landfills or incinerators for disposal or energy recovery, either directly or through intermediaries.
- B. Will not allow the export of hazardous e-waste handled or controlled to be exported to developing countries, either directly or through intermediaries, throughout final disposition.
- C. Will not allow any e-waste handled to be sent to prisons for recycling either directly or through intermediaries.
- D. SAFE HARBOR SYSTEMS and its partners agree to provide visible tracking of hazardous e-waste throughout the product recycling chain. The tracking information shows the final disposition of all hazardous e-waste materials.
- E. SAFE HARBOR SYSTEMS agrees to provide adequate assurance to cover environmental and other costs of the closure of our facility, and additionally to provide liability insurance for accidents and incidents involving wastes under our control and ownership. Additionally we will ensure due diligence throughout the product chain.

SAFE HARBOR SYSTEMS is committed in the support and design for environment and toxics use reduction programs and/or legislation for electronic products.
